roduction of Quicksilver at the Sacramento in January-Dividend in March Is Assured.

The monthly exhibit by the Sacratento of Mercur tells of the production f 77 flasks of quicksilver in January addition to the usual output of gold ullion which passes through the hands Knight & Warnick on the way to the lastern refinery, while a picked samle of ore from the mercurial ore now oing through the retorts shows a perentage of nearly 60 per cent quick-iler, with the average better, perhaps, nan any being mined in this country. ndeed the report shows that the averge the past week attained as much as 5 mercury, the gold that is not burned up" passing into the slag and n to the dump, where it is permitted learn that all refractory properties iav be eliminated before attempt is rade to cyanide it. Although the talat has not warmed up to the mining f quickellyer at the Sacramento, nor trached to it much commercial signifiance, a measurement of the mercurial res now exposed in the mines of the impany, said Manager Glen R. Bothell during the day, discloses a gross aluation exceeding \$200,000, while here is nothing to indicate other than iat back of that exposed is a considable volume of the same class. As a purce of revenue, indeed, the channel as steadily urged itself upon the mangement and its possibilities, finally cognized, are being accordingly de-

Again it is being demonstrated that the rechristening of the old camp, sprestige originally founded upon the igh-grade silver ores of the old Spar-whawk group of mines, "Mercur," a mtraction of Mercury, was no misuo-er. When Uncle Matt Gisborn started it to exploit the old Geyser group it as upon its merits as a quicksilver oposition and sithough its ores were ibsequently mined for the gold con-ined in them, there is no doubt that he mercurial values at periods exeded those of the vellow metal. volved upon the Sacramento to de-onstrate that Mercur was, in reality, camp of quicksilver in commercial iantity and with the larger plant that ill be installed by the company the esent year this will be emphasized.

From the Contact Copper company's property out of Sodaville, Nev., comes a report that at the bottom of the shaft, which is now going down on the ledge, Mr. Smith, the new manager, has uncovered ore that, in addition to the cupric contents, shows as much as \$35 gold per ton, with the average around \$20. It is said that the management has finally demonstrated the strike of the vein and found where it is going down, and it is from this point that the shaft is being put down. The reason for op-tioning their interests to Smith, say Messrs Rettles and Thompson, is that they are afforded an opportunity to get our with a good profit.

IN TOTAL DARKNESS.

Local Interests Know Nothing of the Scrap With Count Ward.

Boston Mass. Fep. 5.—There was very little trading in the copper market during the greater part of the day. The weakness in the New York market in the afternoon started liquidation in local shares, which became quite heavy. There was very little to encourage buyers, and copper stocks continued weak until the closing. More liquidation was in evidence than usual, and traders were inclined to sell the market, following weakness in Amalgamated. The market closed active and heavy. Plans for Early Enlargement of Plant.

Ideal Site for a Second Concentrator of 3000 Tons Daily Capacity-Advancing the Tunnel.

A few more fittings in place and the first unit in the monster mill at which the exhaustless volume of copper, gold and silver-bearing porphyries at Bingham is to be brought into commercial activity will be ready to go into commission on 500 tons daily, said Superintendent Frank Janney, on his return from camp. To increase the plant that 1000 tons daily may be passed over its tables as soon as results derived from the pioneer experiments shall have been verified, said Superintendent Janney, will be a very simple undertaking, while incurring very light expense. Indeed, it will entail nothing more than the construction of an annex at each terminal of the building, in which thirtysix Wilfley tables, two slimeers and eighteen frue vanners are now installed, and to this is he already looking. It s not unlikely, indeed, that at the present plant a capacity of 2000 tons daily will be developed, while not remote from this is a site that, with sufficient water. will afford space for a companion plant. However, this will not be undertaken until the first unit, to be started the present month, has demonstrated its

The directors of the Bingham Con. who have been in continuous session at Boston during the week, have adjourned, according to a bulletin from New York, and the representatives of Western interests, including Hon. W S. McCornick, Capt. Duncan Mac Vichie, Peter L. Kimberly and Williard F. Snyder, yesterday constituted an interesting cluster in the lobbies of the Waldorf-Astoria. In the placing of its authorized bond issue, it is said, in a letter to local interests, that the dimensional content of the property of the content of the c rectors have been assured a market for the paper for some time, and that the proceeds will not only enable the company to discharge every obligation, but provide means with which to carry out a number of projects which have been under serious consideration during the past six months. At the same session, it is said, the pool which has kept the control intact for so long a time was ewed for a year, so that the market shall not be permitted to suffer from any spasmodic unloadings.

It is understood that Messrs, McCornick and Jacob E. Bamberger will leave New York next week for Denver, to be present at the annual meeting of shareholders of the Daly West Mining company, which is scheduled for

Weakness in Men

A Michigan Specialist Finds an Easy Way to Cure Any Case of Sexual Marvelous Record of Successes.

SENT FREE TO ALL WHO

There are thousands of cheerless homes in this country filled with discontent and unhappiness, tacking in love and companionship through the sexual weakness and physical impairment of a man whose years do not justify such a ondition. Indiscretions, abuses and recklessness often cause a temporary cessation of vital power that instantly yields to the wonderful treatment disovered by the great specialist, Dr. H. C. Raynor of Detroit, Michigan. It has emained for this great physician to disover that sexual weakness and similar roubles can be cured and in remarkable short spaces of time. This treatment does not ruin the stomach, adding the miseries such injury entails, but it is a new treatment that easily and quickly restores youthful vigor to men as old ав 85.

The discovery is beyond doubt the nost scientific and comprehensive that City Ticket Office, 201 Main Street our attention has ever been called to. From all sides we hear private reports of cures in stubborn cases of sexual weakness, enlargement of the prostate, varicocele, spermatorrhoea, lost manhood, impotency, emissions, prematurity, shrunken organs, lack of virile power, bashfulness and timidity and like innatural conditions. It does this without appliances, vacuum pumps, electric belts or anything of that kind.

You Pay for What You Get.

That is the way the Burfington runs its dining car business-and what you get is good!.

The above expresses the basis of the popularity of Burlington dining-cars. It is an actual fact that the service and food in Burlington dining-cars equal that of any high-grade restaurant you can call to mind, and the prices as a general rule are less.

One of the best ways of becoming popular is to minister skillfully to the needs of the inner man, and what we want is deserved popularity.
